Summary

Hands-on Oracle DBA with strong Linux, SQL, and scripting skills. Built a multi-schema lab simulating real-world environments, automated backups, and performance monitoring. Certified in Oracle OCI and experienced with OCI + Docker. Open to remote or hybrid DBA roles

Skills

Database: Oracle 23c/19c, PL\SQL, SQL*Plus, SQL Developer

Linux: Oracle Linux 8, Bash, systemd, cron

Cloud: OCI (ATP, Object Storage), AWS RDS (basic)

Scripting: Bash (automation, monitoring), Python

Tools: AWR views, expdp/impdp, RMAN, Terraform (basic)

Projects

Oracle DBA Lab Project — GitHub: ``oracle-dba-lab-portfolio``

- Designed and maintained a 3-schema Oracle 23c environment
- Wrote Bash scripts for backups, monitoring, and listener checks
- Automated exports with ``cron`` and performance views using ``V$SQL``
- Migrated lab to Oracle Cloud ATP and Dockerized version for portability

Certifications

- Oracle Database Administration Associate (OCA) – 23c (Ongoing)
- Oracle Cloud Infrastructure Associate 2025
- CompTIA Linux+

Education

Certified CyberSecurity Technician – EC Council, 2025

Cert in Software Engineering – ALX Africa, 2024

BS in Computer Science – Moi University, 2013
